

From enquiry to outcome

People. Decisions. Follow-ups.
An operations walkthrough.

PRODUCT DEMONSTRATION

9 SEPTEMBER 2026

One enquiry. A visible next owner.

Admin → CRE → PS/SO, with branch oversight from the Sales Manager.

Complaint path: CRE logs a ticket → Complaints department resolves it

Six roles, clear responsibilities

Each workspace follows the person's job.

Admin

Allocate · configure · recover work

CRE

Contact · qualify · log complaints

PS/SO

Follow up · book · retail

Sales Manager

Review branch · coach owners

Complaints

Investigate · resolve · close

Receptionist

Capture walk-ins · select PS

Access controls: leads & administration

“Own” means assigned records; “branch” means the manager’s configured branch.

Action	Admin	CRE	PS/SO	SM	Reception	Complaints
View lead queue	All	Own	Own	Branch	Capture*	No
Capture lead	Yes	Yes	No	No	Walk-in	No
Work sales outcome	Yes	Own	Own	Read only	No	No
Edit CRE qualification	Yes	Own**	No	No	At capture	No
Distribute / reassign	Yes	Handoff**	No	No	At capture	No
Users / master lists	Manage	Read options	Read options	Read options	Read options	Read options

— Capture*: own reception dashboard. Own** / Handoff**: CRE qualification rules apply.

Access controls: complaints & reporting

The complaint logger, resolver and management viewer have different rights.

Action	Admin	CRE	PS/SO	SM	Reception	Complaints
Log complaint	No	Yes	No	No	No	No
Read complaint	All	Own logged	No	No	No	All
Change status / priority	No	No	No	No	No	Yes
Add note / resolve / close	No	No	No	No	No	Yes
Complaint analytics	All + team	No	No	No	No	Shared
Sales reporting	Company	Personal	Personal	Branch	Own today	No sales UI

— CRE logs. Complaints team resolves. Admin observes.

Admin controls the operating setup

Set up the team, allocate work, and handle exceptions.

— Keep branch names consistent across users, lead records and Admin Lists.

Three entry routes into the CRM

Sources describe origin; imports and forms bring the enquiries in.

— Walk-ins bypass the CRE allocation step; confirm branch and enquiry date for reporting.

Check the data before importing

Review the upload summary, then confirm import.

Check	Current behavior	Operator response
CSV / XLSX	Up to 10 MB	Use expected column headers
Phone duplicate	Skip CRM or same-file repeats	Review the existing enquiry
Name / phone invalid	Skip the invalid row	Correct and re-upload
Source / model mismatch	Reject invalid configured value	Use Admin Lists values
Enquiry date	Future rejected; missing may default	Confirm the actual enquiry date

 **Import duplicate checks do not prevent repeated phone numbers in manual entry.**

Choose how the batch is shared

Individual assignment, filtered buckets, or global Auto assign.

ILLUSTRATIVE ALLOCATION • NOT COMPANY PERFORMANCE

— Use filtered buckets for a scoped demo. Auto assign ignores the active screen filters.

Branch determines sales ownership and visibility

A responsibility map, not an extra approval chain.

— CRE remains attached after handoff. SM sees records matching their configured branch.

CRE chooses the next path

Record what the customer said, then complete the matching fields.

— Qualification starts the sales handoff; it does not mean a booking or completed sale.

A complete qualification makes the handoff useful

Choose an active PS/SO from the customer's preferred branch.

REMARKS

What PS should
discuss

SAVE QUALIFIED → SAME LEAD, CRE CONTEXT, NAMED PS

PS/SO records the sales conversation

Choose Connected / Not Connected, then an outcome and remarks.

Customer situation	PS outcome examples	Next state
Needs more work	Test drive · showroom visit · need time	Pending + follow-up
Asks for another call	Call Me Back	Callback + follow-up
Does not answer	RNR · Switch Off · Line Busy	Retry / follow-up
Has booked / purchased	Booking Done / Retail Done	Booked / Retailed
Will not proceed	Finance Rejected · Lost to Competition	Lost

 No Response loss is a manual choice. F1–F5 does not automatically close a lead.

Follow-up is a repeating work cycle

A new outcome resolves the previous open follow-up and records the next plan.

— CRE / PS selects a day; the current screen saves it at 23:59 IST. Coordinate the next caller.

Translate screen labels into sales events

Lead status and sales outcome are separate fields.

Business event	Screen choice	Lead status	Sales outcome
Ready for PS	CRE: Qualified	Qualified	Pending
Needs more contact	Need time / Visit	Pending	Pending
Booking confirmed	Booking Done	Walk-in / Booked	Booked
Sale completed	Retail Done	Won / Retailed	Retailed
Customer lost	Loss outcome	Lost	Lost

— A Walk-in source is different from the Walk-in / Booked status.

Five scenarios to demonstrate

For each: starting record → staff action → saved result.

- | | | |
|---|--------------------------|-------------------------------------|
| 1 | CRE → Qualified | Qualification + branch + named PS |
| 2 | CRE → Lost | Loss reason + customer remarks |
| 3 | Qualified → PS follow-up | Next action + scheduled date |
| 4 | Qualified → PS Lost | Sales loss + retained CRE history |
| 5 | CRE → Complaint | Ticket + complaints-team resolution |

01 / CRE qualifies the enquiry

DEMO ASHA: “I have decided on a model and want to discuss buying.”

— Open the same record after saving: verify status, owner and history.

02 / CRE closes a lost enquiry

DEMO BINU: “We have dropped our purchase plan.”

— Open the same record after saving: verify status, owner and history.

03 / PS continues the follow-up

DEMO CHARU: "I need a test drive before deciding."

— Open the same record after saving: verify status, owner and history.

04 / PS records a sales loss

DEMO DEEPAK: "I have chosen a competing product."

— Open the same record after saving: verify status, owner and history.

05 / CRE hands a complaint to the resolution team

DEMO FARAH: "My delivery issue needs attention."

— Complaint is a separate ticket. It does not automatically change or link the sales lead.

Complete the sales story

PS/SO records progress after the company's sales process supports it.

QUALIFIED

Read CRE context

FOLLOW-UP

Resolve questions

BOOKED

Booking Done + next
date

RETAILED

Retail Done + remarks

— Booking and retail are CRM outcomes; payments, invoicing and inventory remain separate.

Walk-ins can go straight to PS/SO

Capture the visitor and select the sales user.

RECEPTION

Customer • model • color

SELECT PS

Active sales user

QUALIFIED

Walk-in source

PS FOLLOW-UP

Continue the sales flow

REQUIRED OPERATING CHECK: complete branch and enquiry date for manager reporting.

Complaints: shared queue, documented resolution

Only the complaints department changes status, priority or resolution.

— Sequence is recommended practice; SLA targets and escalation contacts need agreement.

Sales Manager: inspect, understand, direct

Read-only oversight of the configured branch.

SPOT

Untouched /
overdue work

OPEN

Lead and owner
history

DIRECT

Owner acts; Admin
reallocates

— Stale = currently Fresh and created at least three calendar days ago.

Read dashboard numbers in context

Current-state counts support daily review; agree definitions before using targets.

Measure	What it represents	What to avoid assuming
Qualified	Current Qualified status	Everyone who ever qualified
Booked / Retailed	Current sales outcome	An immutable sales ledger
Contacted	Status is no longer Fresh	Verified connected call
Lead-to-retail %	Retailed ÷ selected lead cohort	Same cohort across different filters
Lost reasons	Call outcomes on currently lost leads	One final reason per unique lead

— Keep branch and date filters visible; open records to explain the count.

Make the queues part of the working day

Suggested rhythm; agree timings with the manager.

— Complaints need their own queue review and escalation owner.

Exceptions: what staff should do next

Keep the customer record and next owner clear.

Exception	Current handling	Operator action
No matching active PS	Qualification cannot complete	Admin checks branch and staffing
Already assigned / conflicting save	Dedicated action rejects conflict	Refresh; read owner and history
Invalid follow-up date	Save rejected	Use today / tomorrow within limit
SM cannot see the lead	Branch or dates may exclude it	Check branch, enquiry date, filters
Reminder not visible	Live delivery needs verification	Use due queues; confirm scheduler

— Reopen and escalation flags lack a complete visible workflow; verify before promising them.

Staff changes need two handovers

Dedicated lifecycle flow for CRE and PS/SO.

— Re-enable does not return transferred leads. Deleted accounts cannot be re-enabled.
